

Player Report on A. Do Marcolino

Season 2025/2026 Club FK Ústí nad Labem

Date of Report 17-07-2026 Position CF Age 24 Foot Right Height 1.94m

Physique

A genuinely imposing frame (194cm/83kg) that shows up directly in the data — an elite 90% Target Man role-fit score — though his actual aerial win rate (42.3%) is more modest than the height alone would suggest, meaning there is still more to unlock in the air.

Pace

Not an explosive runner, but has enough mobility to be useful in transition — 1.75 progressive runs/90 and 0.52 accelerations/90 — and it shows up in his carrying: 2.27 dribbles/90 at a strong 54.6% success rate, clearly the best carrying output of this group.

Work-Rate

Competitive defensive workload for a No.9 — 4.75 defensive actions/90, 1.75 interceptions/90 — with a Pressing CF role-fit of 50%, a functional rather than elite pressing forward.

Attitude

A standout defensive-duel win rate of 70.7% signals real physical dominance and competitiveness in 1v1 duels, even though his overall duel win rate (38.4%) is dragged down by a weaker return in offensive duels (27.6%).

Technical

Right-footed with the most complete technical package of the three: 46.2% of shots on target (clearly the best conversion of chances into test-the-keeper efforts), functional passing (77.3% accuracy), and by far the best dribble success rate of this group (54.6%).

Intelligence

Elite movement into the box (5.88 box touches/90) combines with a positive goals-minus-xG of +1.03 across 872 minutes (6 goals from 4.97 xG) — a real signal of composure and finishing instinct beyond what his underlying chances alone would predict.

Comments

The strongest and most complete CF profile of the three covered in this cycle. A physically mature 24-year-old target forward, one tier below Hradec Králové's level (Czech National Football League), who is outscoring his own xG, carrying the ball well for a player of his size, and rates as an elite Finisher/Target Man on role-fit (93% / 90%). Genuinely ready for a look at a higher level, with the usual caveat that a step up a division brings its own adjustment risk.

Strengths

- Positive finishing signal — outscoring his own xG by +1.03 over the sample (6 G vs 4.97 xG)
- Elite Finisher and Target Man role-fit scores (93% / 90%)
- Best shot quality (46.2% on target) and ball-carrying success (54.6% dribbles) of the group
- Standout physical/competitive signal in defensive duels (70.7% won)

Weaknesses

- Below-average offensive-duel win rate for his frame (27.6%)
- Limited creative output — finishes far more than he creates (0.05 xA/90, 0.31 key passes/90)
- Aerial win rate (42.3%) is modest relative to his height — underdelivering in the air so far
- One tier below Hradec's level — the jump to the Czech top flight is the main adaptation risk

Overall rating: 7.5 / 10

Fit pro HK: 7 / 10
