

Player Report on Kahuan Vinicius

Season 2025/2026 Club FK Karviná

Date of Report 17-07-2026 Position CF Age 22 Foot Unknown (not recorded) Height Unknown (not recorded)

Physique

Height/weight are not recorded in the data, but his role-fit profile (73% Finisher, 68% Target Man) and a respectable 42% aerial-duel win rate point to a physically competitive presence inside the box rather than a slight, elusive forward.

Pace

Very low mobility numbers — 0.44 progressive runs/90 and just 0.15 accelerations/90 — place him among the least mobile forwards in the sample. He is not a runner in behind; his game is built on where he stands, not how fast he gets there.

Work-Rate

Moderate defensive workload for a lone striker (3.34 defensive actions/90, 1.6 interceptions/90). Pressing CF role-fit sits at only 31%, so he is not a high-intensity front-foot forward, but he is not entirely passive off the ball either.

Attitude

Engages in duels frequently (21.2/90) but wins only 37.7% of them, and offensive duels specifically are won just 23.5% of the time. High engagement, low return — persistence without control.

Technical

Passing is tidy (86% accuracy) but his end product with the ball at feet is weak: only 16.7% of dribble attempts succeed, and creative output is negligible (0.02 xA/90, 0.15 key passes/90). He is not a carrier or creator.

Intelligence

Gets into good scoring areas — 3.78 box touches/90 and 0.51 xG/90 are solid underlying numbers for the level — but 2 goals from 3.52 xG (-1.52) over the sample is a significant finishing shortfall relative to the chances he generates.

Comments

A young Brazilian No.9 whose underlying chance generation is more encouraging than his output. On a genuinely small sample (11 matches, 619 minutes) he combines real box presence with almost no mobility or ball-carrying quality, and a finishing return well below his xG. For Hradec Králové specifically: the club's vertical, transition-based attacking model rewards forwards who can progress and accelerate — Vinicius's numbers run counter to that identity, echoing the same style mismatch flagged for comparable target forwards in this scouting cycle.

Strengths

- Generates good chance volume and box presence for his role (0.51 xG/90, 3.78 box touches/90)
- Competitive in the air (42.1% aerial duels won)
- Reliable passer under pressure (86% pass accuracy)

Weaknesses

- Significant finishing underperformance versus his own chance quality (-1.52 G-xG)
- Very low mobility / progression (0.44 progressive runs/90, 0.15 accelerations/90)
- Poor dribble retention (16.7% success) and minimal creative output
- Tiny sample (11 matches) — treat all of the above as provisional

Overall rating: 5.5 / 10

Fit pro HK: 4 / 10
