

Player Report on N. Milić

Season 2025/2026 Club FK Karviná

Date of Report 17-07-2026 Position LB / LCB Age 22 Foot Left Height 1.85m

Physique

A good frame for a full-back (185cm/77kg), backed up by a strong 52.2% aerial-duel win rate — well above what is typical for a player in this role, suggesting genuine physical competitiveness against crosses and long balls.

Pace

Moderate ball-carrying instincts from deep — 1.0 progressive run/90 and 1.33 dribbles/90 at a healthy 50% success rate — though the sample shows no recorded accelerations, which is worth checking on video rather than taking at face value given the small minutes total.

Work-Rate

Very heavily involved in build-up: 37 passes/90 is a high volume for a full-back, with 9.17 progressive passes/90 standing out. Defensive work is solid rather than spectacular — 7.0 defensive actions/90 and 2.5 interceptions/90.

Attitude

Competes actively (17.3 duels/90, winning 53.9%) without over-committing — fouls stay controlled at 1.5/90. Reads as a disciplined, engaged defender rather than a reckless one.

Technical

Left-footed with genuine passing range — 82% accuracy at high volume, plus strong crossing volume (2.5/90) though accuracy on those crosses is modest (33.3%). Passing, not crossing, is the standout tool.

Intelligence

Role-fit data confirms a genuine Ball-Playing Full-Back profile (62%, primary role) — he progresses the team through passing more than through dribbling or crossing, and offers a reliable outlet from deep positions.

Comments

A 22-year-old, left-footed, ball-progressing full-back / wide centre-back from Karviná. The sample is small (10 matches, 540 minutes) and the near-zero attacking output (0 xG, minimal key passes) is expected for the role rather than a concern. His standout trait — progressive passing volume — is a good stylistic match for a team that wants to build quickly through deep, secure passers, but his 1v1 defensive numbers need live or video verification before trusting them at a higher level.

Strengths

- Strong progressive-passing range and volume for a full-back (9.17 progressive passes/90)
- Aerially competitive for the position (52.2% duels won)
- Composed and controlled in duels (53.9% win rate, low foul count)
- Positional versatility (LB and LCB)

Weaknesses

- Weaker isolated 1v1 defending signal relative to league peers (low 'Stopper' role-fit)
- Crossing accuracy is poor (33.3%) despite reasonable volume
- Very small sample (10 matches) — defensive robustness unverified
- No offensive end product recorded (0 goals, 0 xG) — expected for the role, not a flaw per se

Overall rating: 6 / 10

Fit pro HK: 6 / 10
