

Player Report on A. Do Marcolino

Season 2025/2026 Club FK Ústí nad Labem

Date of Report 17-07-2026 Position CF Age 24 Foot Right Height 1.94m

Physique

A genuinely imposing physical frame that shows up clearly in how he plays — a real focal point and target man, though there is still more to unlock in the air relative to his size.

Pace

Not an explosive runner, but carries enough mobility to be useful in transition, and it shows up clearly in his ball-carrying, which is comfortably the best of this group.

Work-Rate

A competitive defensive workload for a No.9 — functional rather than elite in his pressing contribution.

Attitude

Shows real physical dominance and competitiveness in defensive duels, even though his overall duel return is dragged down by a weaker showing in offensive duels.

Technical

The most complete technical package of the three covered here — good shot quality, functional passing, and clearly the best dribbling success rate of the group.

Intelligence

Excellent movement into the box combined with a finishing return that outstrips his underlying chance quality — a real signal of composure and instinct in front of goal.

Comments

The strongest and most complete centre-forward profile of the three covered in this cycle. A physically mature target forward, one tier below Hradec Králové's level, who is outperforming his own underlying chances, carrying the ball well for a player of his size, and profiles as an elite finisher and target man. Genuinely ready for a look at a higher level, with the usual caveat that a step up a division brings its own adjustment risk.

Strengths

- Outperforming his own underlying chance quality — a real finishing signal
- Profiles as an elite finisher and target man
- Best shot quality and ball-carrying success of the group
- Standout physical and competitive signal in defensive duels

Weaknesses

- Offensive duel win rate is below what his frame would suggest
- Limited creative output — finishes far more than he creates for others
- Aerial dominance is modest relative to his height — underdelivering in the air so far
- One tier below Hradec's level — the jump to the Czech top flight is the main adaptation risk

Overall rating: 7.5 / 10

Fit pro HK: 7 / 10
