

Player Report on Kahuan Vinicius

Season 2025/2026 Club FK Karviná

Date of Report 17-07-2026 Position CF Age 22 Foot Unknown (not recorded) Height Unknown (not recorded)

Physique

Height and weight are not confirmed, but he holds his own physically inside the box and competes well in the air, giving the impression of a sturdy, competitive frame rather than a light, elusive forward.

Pace

Not a mobile or explosive forward. He offers almost no running in behind and rarely drives with the ball from deeper positions — his game is built on where he stands in the box, not on how fast he gets there.

Work-Rate

Limited pressing intensity for a lone striker, though he is not entirely passive off the ball and does put in a moderate defensive shift when needed.

Attitude

Engages in duels often but wins few of them. That points to persistence and a willingness to compete rather than genuine physical control or dominance in those contests.

Technical

A tidy, reliable passer, but his work with the ball at his feet is weak — dribbles rarely come off — and he offers almost nothing creatively for teammates. Not a carrier or a creator.

Intelligence

Finds good scoring positions consistently and generates encouraging underlying chances, but badly underdelivers in front of goal relative to the openings he creates for himself — a clear composure and finishing gap.

Comments

A young Brazilian No.9 whose movement and underlying chance generation are more encouraging than his output. On a small sample, he combines a real presence inside the box with almost no mobility or ball-carrying quality, and a finishing return that lags well behind the chances he creates. For Hradec Králové specifically: the club's vertical, transition-based attacking model rewards forwards who can progress and accelerate the ball themselves — Vinicius's profile runs counter to that identity.

Strengths

- Consistently finds good scoring positions and threatens the box
- Competitive and combative in the air
- Reliable, tidy passer under pressure

Weaknesses

- Significant finishing underperformance relative to the chances he creates
- Very limited mobility and ball progression from deep
- Poor ball retention when dribbling, with minimal creative output
- Small sample size — the profile should be treated as provisional

Overall rating: 5.5 / 10
