

Player Report on N. Milić

Season 2025/2026 Club FK Karviná

Date of Report 17-07-2026 Position LB / LCB Age 22 Foot Left Height 1.85m

Physique

A good, physically mature frame for a full-back, backed up by genuine competitiveness in the air against crosses and long balls — well above what is typical for the position.

Pace

Shows some ball-carrying instinct from deep positions and a moderate ability to break lines with the dribble, though he is not an explosive or especially frequent runner — worth confirming on video given the limited sample available.

Work-Rate

Very heavily involved in build-up play — consistently on the ball and progressing it forward. Defensive work off the ball is solid without being spectacular.

Attitude

Competes actively in duels without over-committing or becoming reckless. Reads as a disciplined, engaged defender rather than an aggressive risk-taker.

Technical

Left-footed with genuine passing range and composure on the ball. His crossing volume is decent but end product from wide areas is inconsistent — passing, not crossing, is his standout tool.

Intelligence

Profiles as a genuine ball-playing full-back — he progresses the team primarily through passing rather than dribbling or crossing, and offers a reliable outlet from deep positions.

Comments

A young, left-footed, ball-progressing full-back / wide centre-back from Karviná. The sample is small and the near-absence of attacking end product is expected for the role rather than a concern. His standout trait — progressive passing — is a good stylistic match for a team that wants to build quickly through deep, secure passers, but his one-on-one defending needs live or video verification before trusting it at a higher level.

Strengths

- Strong progressive passing range and composure in possession
- Competitive in the air for his position
- Composed and controlled in duels, rarely reckless
- Positional versatility across left-back and left centre-back

Weaknesses

- Isolated one-on-one defending looks like the weaker part of his game relative to peers
- Crossing end product is inconsistent despite reasonable delivery volume
- Small sample size — defensive robustness still unverified
- No attacking end product on the season, though this is expected for the role

Overall rating: 6 / 10

Fit pro HK: 6 / 10
