EXECUTIVE SUMMARY

The 2025/26 season is complete. Kuol's 2.13 xG in 756 minutes and elite dribble volume (5.12/90, top-5 Czech league) mark him as a high-upside loan target. Zero goals on 2.13 xG signals finishing variance, not a lack of attacking intent. His age-resale ceiling (98.3) and development value (78.0) are exceptional. The 2029 Sparta Praha contract means loan-only for 2026/27 is the realistic pathway. Move before the summer window closes.

STRENGTHS	CONCERNS	NEXT STEPS
→ xG volume 2.13 xG in 756 min; major goal-scoring upside yet to convert → Dribble elite 5.12 dribbles/90, 62.8% success; direct vertical carrier → Age ceiling Age Resale 98.3, Dev. Value 78.0; maximum upside at 21 → Creation threat 0.91 xA / 1 assist; active, creative final-third presence → Smart Club fit Strong Benfica academy upside model alignment	→ 0 goals in 756 min xG underperformance (2.13 xG, 0 G); finishing concern → Physical score 28.6; very low model score, SkillCorner sample only 75 min → Ball security 32.2 ball security score; can be bypassed under pressure → Contract length Sparta Praha 2029; permanent transfer not feasible this window → Limited SC data 75 min / 6 performances in SkillCorner; treat as indicative	→ Confirm loan availability with Sparta Praha for 2026/27 season → Request full video package (min. 8 matches, focus on chance conversion) → Arrange bilateral meeting with Sparta Praha agent by 31 July 2026 → Structure: 12-month loan with option; target arrival August 2026 → Priority: Unlock xG underperformance — positional freedom is key
