

Player Report on A. Do Marcolino

Season 2025/2026 Club FK Ústí nad Labem

Date of Report 17-07-2026 Position CF Age 24 Foot Right Height 1.94m

Physique

A genuinely imposing physical frame that shows up clearly in how he plays. A real focal point and target man, though there is still more to unlock in the air relative to his size.

Pace

Not an explosive runner, but he carries enough mobility to be useful in transition, and it shows up clearly in his ball carrying, which is comfortably the best of this group.

Work-Rate

A competitive defensive shift for a number nine. Functional rather than elite in his pressing.

Attitude

Shows real physical dominance and competitiveness in defensive duels, even though he is less effective in duels going forward.

Technical

The most complete technical package of the three covered here. Good shot quality, functional passing, and clearly the best dribbling of the group.

Intelligence

Excellent movement into the box combined with a finishing touch that looks better than the chances themselves would suggest. A real sign of composure and instinct in front of goal.

Comments

The strongest and most complete centre forward of the three covered in this cycle. A physically mature target forward, one tier below Hradec Králové's level, who finishes better than his chances alone would suggest, carries the ball well for a player of his size, and looks like an elite finisher and target man. Genuinely ready for a look at a higher level, with the usual caveat that a step up a division brings its own adjustment risk.

Strengths

- Finishes better than his chances alone would suggest, a real sign of quality in front of goal
- Looks like an elite finisher and target man
- Best shot quality and ball carrying of the group
- Standout physical and competitive edge in defensive duels

Weaknesses

- Less effective in duels going forward than his frame would suggest
- Limited creative touch, finishes far more than he creates for others
- Aerial presence is modest relative to his height, underdelivering in the air so far
- One tier below Hradec's level, the jump to the Czech top flight is the main adjustment risk

Overall rating: 7.5 / 10

Fit pro HK: 7 / 10
