

Player Report on I. Diomandé

Season 2025 Club FK RFS

Date of Report 20-07-2026 Position CF / LAMF Age 22 Foot Right Height n/a

Physique

Size is not confirmed, but his willingness to get stuck into a lot of duels suggests he does not shy away from contact, even if he does not always come away with the ball.

Pace

A direct, high volume dribbler who gets into the box and into shooting positions very consistently. Clearly comfortable running at defenders.

Work-Rate

Constantly engaged. A very high amount of duelling marks him as a persistently involved, combative forward.

Attitude

Very willing to engage physically, though a concerning number of fouls conceded suggests that competitiveness sometimes tips into rash challenges.

Technical

Direct and productive in front of goal, though his overall involvement in general passing play is minimal. A penalty box operator more than a build up participant.

Intelligence

Gets into the box and shoots more than almost anyone covered in this cycle relative to his minutes on the pitch. A real, live goal threat, and his finishing has been slightly ahead of the chances themselves so far.

Comments

A young Ivorian forward with a genuine, direct goal threat and very high energy and duelling, on a small number of matches watched so far. The discipline concerns and low general involvement in passing suggest a raw, high ceiling talent who needs polishing rather than a finished product.

Strengths

- Goal output slightly ahead of the chances he gets, a good early sign
- Very high box arrival and dribbling
- Combative and persistent

Weaknesses

- Discipline and fouls are a concern
- Minimal involvement in general passing play
- Comes away with the ball in duels less often than his engagement would suggest
- Small number of matches watched so far, treat as an early picture

Overall rating: 6.5 / 10

Fit pro HK: 5.5 / 10
