

Player Report on T. Nemčík

Season 2025 Club Rosenborg BK

Date of Report 20-07-2026 Position LCB Age 25 Foot Left Height 1.89m

Physique

A good, physically mature frame for a centre back. Genuinely competitive in the air.

Pace

Surprisingly comfortable carrying the ball out from the back for a centre back, with an unusually high success rate on the occasions he does dribble past a man.

Work-Rate

Disciplined and controlled positioning, reflected in a very low number of fouls conceded.

Attitude

Reads danger early rather than relying on recovery challenges. A proactive rather than reactive defender.

Technical

An excellent distributor. Very comfortable and accurate in possession, genuinely happy building play from the back.

Intelligence

His reading of the game and interceptions are the standout traits of his entire game. Among the best readers of danger covered in this cycle.

Comments

A composed, left footed centre back with genuine passing range and sharp anticipation, though the picture is still based on a small number of matches watched. He looks like exactly the kind of ball playing defender a possession based build up wants, but needs a larger body of video evidence before trusting the picture fully.

Strengths

- Excellent reading of the game and interceptions
- Excellent passing range and accuracy
- Comfortable carrying the ball out from the back
- Left footed variety at the back

Weaknesses

- Small number of matches watched so far, a heavy caveat on all of the above
- Aerial presence is solid but not standout
- Needs a larger run of matches to confirm the picture

Overall rating: 6.5 / 10

Fit pro HK: 6 / 10
