

Player Report on W. Freney

Season 2025/2026 Club Perth Glory

Date of Report 20-07-2026 Position LCMF / LDMF Age 20 Foot n/a Height n/a

Physique

Nothing in how he plays marks him out physically. A functional rather than imposing midfield frame.

Pace

Shows genuine carrying instinct and a willingness to drive with the ball rather than just recycle it, without being an especially explosive mover.

Work-Rate

A committed defensive contributor for his age, consistently involved without being the main destroyer in his midfield.

Attitude

Competes actively without being reckless. Engaged in the game rather than passive.

Technical

Tidy in possession with a decent passing platform. Modest end product going forward but shows flashes of creativity.

Intelligence

Still developing. His overall involvement in the game suggests a genuine two way player rather than a specialist, but nothing yet marks him out as elite in either direction.

Comments

A young Australian central midfielder with a broad, two way game rather than one standout trait. Encouraging for his age but not yet a finished or specialist player. Worth monitoring for development rather than an immediate difference maker.

Strengths

- Genuine two way contribution for his age
- Tidy on the ball with some carrying and creative instinct
- Competitive without being reckless

Weaknesses

- No standout elite trait yet in any single phase
- Limited end product going forward
- Physical presence and duelling are unremarkable
- Young, developing player who needs time

Overall rating: 5.5 / 10

Fit pro HK: 5 / 10
