

Player Report on I. Diomandé

Season 2025 Club FK RFS

Date of Report 20-07-2026 Position CF / LAMF Age 22 Foot Right Height n/a

Physique

Height and weight are unrecorded, but his willingness to engage in a very high volume of duels suggests he doesn't shy away from contact, even if he doesn't consistently win those contests.

Pace

A direct, high-volume dribbler who gets into the box and shooting positions very consistently — clearly comfortable running at defenders.

Work-Rate

Engages constantly — an extremely high overall duel count marks him as a persistently involved, combative forward.

Attitude

Very high engagement across duels, though a concerning foul count suggests that competitiveness sometimes tips into rash challenges.

Technical

Direct and productive in front of goal, though his overall involvement in general passing play is minimal — a penalty-box operator more than a build-up participant.

Intelligence

Gets into the box and shoots more than almost anyone in this batch relative to his minutes — a real, live goal threat, running slightly ahead of his underlying chance quality.

Comments

A young Ivorian forward with a genuine, direct goal threat and very high work and duel engagement, on a small sample. The discipline concerns and low general passing involvement suggest a raw, high-ceiling talent who needs polishing rather than a finished product.

Strengths

- Genuine goal output slightly ahead of his underlying chance quality
- Very high box-arrival and dribbling volume
- Combative and persistent engagement

Weaknesses

- Discipline and foul concerns
- Minimal involvement in general passing play
- Offensive duel win rate below what his engagement volume would suggest
- Small sample size — treat as provisional

Overall rating: 6.5 / 10

Fit pro HK: 5.5 / 10
