

Player Report on J. Nisbet

Season 2025/2026 Club Roda JC Kerkrade

Date of Report 20-07-2026 Position LDMF / LCMF Age 26 Foot Right Height 1.60m

Physique

A notably small, light frame for a central midfielder — yet it clearly doesn't limit his effectiveness across almost every phase of the game.

Pace

Comfortable carrying the ball through midfield with a genuine dribbling and progression game.

Work-Rate

A true ever-present — barely misses a match, and the sheer volume of matches played speaks to durability and trust from his coaching staff.

Attitude

Wins the clear majority of his duels despite his frame — competes on technique and anticipation rather than physicality.

Technical

A genuinely well-rounded passer and dribbler, contributing directly to goals through both his own finishing and his creative output.

Intelligence

A complete central-midfield profile — contributes going forward, wins the ball back, and rarely stops playing. One of the most well-rounded profiles covered in this cycle.

Comments

The standout performer of this batch. A physically undersized central midfielder who compensates entirely through technique, engagement, and availability — genuine goal and assist involvement from central midfield, excellent defensive duel numbers, and remarkable durability. The physical profile is the only real question mark against an otherwise complete package.

Strengths

- Genuine goal and assist involvement from central midfield
- Excellent defensive duel win rate despite his size
- Outstanding durability and availability
- Well-rounded passing and carrying game

Weaknesses

- Notably light physical frame — likely to be tested aerially and physically at a higher level
- Crossing and wide delivery are modest

Overall rating: 8 / 10

Fit pro HK: 7 / 10
