

Player Report on L. Vickery

Season 2025/2026 Club Macarthur FC

Date of Report 20-07-2026 Position RW / RAMF Age 20 Foot n/a Height n/a

Physique

Undersized for aerial contests, which clearly isn't his game — this is a ground-based, dribbling wide threat rather than a physical presence.

Pace

A genuinely explosive carrier — his dribbling is the standout trait of his entire profile, comfortably the most dynamic ball-carrier covered in this cycle.

Work-Rate

Limited defensive contribution — his value is almost entirely in the final third.

Attitude

Competitive and direct in one-on-one attacking situations, less involved physically without the ball.

Technical

A genuine dribbler and crosser with real end product for his age — goals and underlying chance quality both point to a live goal threat from wide areas.

Intelligence

Gets into the box consistently and creates shooting opportunities for himself through direct running rather than combination play.

Comments

The most explosive attacking talent covered in this cycle — a young, direct wide forward whose dribbling and box-arrival numbers stand out clearly. Raw defensively, but a genuine attacking weapon at his age.

Strengths

- Elite dribbling volume and success rate
- Genuine goal threat for a winger
- Gets into the box consistently
- Direct, progressive ball-carrier

Weaknesses

- Minimal aerial or physical presence
- Limited defensive work
- Crossing end product is inconsistent
- Young — defensive side of his game still needs development

Overall rating: 7 / 10

Fit pro HK: 6 / 10
