

Player Report on R. Sanusi

Season 2025/2026 Club FK Podbrezová

Date of Report 20-07-2026 Position LWB / LB / RWB Age 23 Foot n/a Height n/a

Physique

Nothing in the data marks him out physically — a functional rather than dominant frame.

Pace

A genuine ball-carrier for a wing-back — comfortable dribbling and progressing the ball forward.

Work-Rate

Engages in a high volume of duels and delivers a real volume of service into the box.

Attitude

Very high overall engagement in duels, though his discipline is a mild concern.

Technical

Genuine crossing range and volume, and involved in chance creation more than most defenders covered in this cycle — the underlying final-third involvement he generates suggests real quality that simply hasn't converted into goals of his own yet.

Intelligence

A modern, attack-minded wing-back who gets forward and contributes to the final third consistently, though his own defensive return lags behind his attacking involvement.

Comments

A Nigerian wing-back with real attacking upside — good ball-carrying, crossing volume, and involvement in the final third — but his defensive numbers and discipline lag behind the attacking side of his game. A boom-or-bust profile that leans attacking.

Strengths

- Genuine attacking involvement and chance creation from wing-back
- Good ball-carrying and crossing range
- Willing and frequent in duels

Weaknesses

- Defensive duel win rate is below what's needed at a higher level
- Discipline and foul concerns
- His own attacking involvement hasn't yet converted into goals

Overall rating: 6 / 10

Fit pro HK: 5.5 / 10
