

Player Report on T. Nemčík

Season 2025 Club Rosenborg BK

Date of Report 20-07-2026 Position LCB Age 25 Foot Left Height 1.89m

Physique

A good, physically mature frame for a centre-back — genuinely competitive in the air.

Pace

Surprisingly comfortable carrying the ball out from the back for a centre-back, with an unusually high success rate on the occasions he does dribble.

Work-Rate

Disciplined and controlled positioning, reflected in a very low foul count.

Attitude

Reads danger early rather than relying on recovery challenges — a proactive rather than reactive defender.

Technical

An excellent distributor — very high passing volume and accuracy, genuinely comfortable building play from the back.

Intelligence

His interceptions are the standout trait of his entire profile — among the best readers of the game covered in this cycle.

Comments

A composed, left-footed centre-back with genuine passing range and elite anticipation, though the sample is small. Profiles as exactly the kind of ball-playing defender a possession-based build-up wants, but needs a larger body of evidence before trusting the numbers fully.

Strengths

- Elite interceptions and reading of the game
- Excellent passing range and accuracy
- Comfortable carrying the ball out from the back
- Left-footed variety at the back

Weaknesses

- Very small sample size — a heavy caveat on all of the above
- Aerial output is solid but not standout
- Needs a larger run of matches to confirm the profile

Overall rating: 6.5 / 10

Fit pro HK: 6 / 10
