

Player Report on W. Freney

Season 2025/2026 Club Perth Glory

Date of Report 20-07-2026 Position LCMF / LDMF Age 20 Foot n/a Height n/a

Physique

Nothing in his profile marks him out physically — a functional rather than imposing midfield frame.

Pace

Shows genuine carrying instinct and a willingness to drive with the ball rather than just recycle it, without being an especially explosive mover.

Work-Rate

A committed defensive contributor for his age, consistently involved without being the primary destroyer in his midfield.

Attitude

Competes actively without being reckless — engaged in the game rather than passive.

Technical

Tidy in possession with a decent passing platform; modest end product going forward but shows flashes of creativity.

Intelligence

Still developing — his underlying involvement suggests a genuine two-way profile rather than a specialist, but nothing yet marks him out as elite in either direction.

Comments

A young Australian central midfielder with a broad, two-way skill set rather than one standout trait. Encouraging for his age but not yet a finished or specialist profile — worth monitoring for development rather than an immediate difference-maker.

Strengths

- Genuine two-way involvement for his age
- Tidy on the ball with some carrying and creative instinct
- Competitive without being reckless

Weaknesses

- No standout elite trait yet in any single phase
- Limited end product going forward
- Physical and duel numbers are unremarkable
- Young, developing profile — needs time

Overall rating: 5.5 / 10

Fit pro HK: 5 / 10
